The demand was of a general character, and included purchases for the different European and Northern markets.

Prices disclosed a decided improvement, the principal portion of the lists sold changing hands at figures indicating an irregular advance of fully 2c per pound, the market closing so completely unsettled, however, that we are compelled to pretermit quotations altogether. The day's transactions would have been more liberal, had not the meagreness of desirable descriptions prevented several buyers from purchasing.

It is estimated that seven tenths of all adult allments proceed from a deceased and torpid liver. The biliary secretions of the liver overflowing into the stomach poison the entire system and exhibit the above symptoms.
After long rescarch, we are able to present the most remarkable cure for these horrid nightmare diseases, the world has ever produced. Within one year over six hundred and forty thousand persons have taken the Plantation Bitteres, and not an instance of complaint has come to our knowledge!

The reports that it relies upon mineral substances for its active properties, are wholly false. For the satisfaction of the public, and that patients may consult their physicians, we append a list of its components.

Calibrata Habs.—Celebrated for over two hundred years in the treatment of Fever and Ague, Dyspepsia, Weakness, etc. It was introduced into Europe by the Countess, wife of the Vicercy of Peru, in 1840, and afterwards sold by the Jesuits for the enormous price of its own weight in riber, under the name of Jesuit's Proceeders, and was finally made public by Louis XVI, Kingg of France. who will avail themselves of its remedial power may be benefitted.

It only requires a fair trial to confirm its invaluable agency in diffusing through each channel of the human organization a restored viality. It invigorates and embues the Lungs with healthful elasticity; restores warmth, which is their easontial element; rouses the sluggish vessels into activity; heals the affected lobes; purifies and enriches the blood; regulates the circulation; induces free and easy respiration, and expels, through its săministration, each and every concomitant disorder present in the malady recognized as Consumption, and hitherto deemed hopeless and incurable.

This compound is perfectly eafe, peasessing neither narcotic nor emetic properties, which unfortunately are always employed as essentials in every preparation for Cough or Lung affection—a mistake which too often in its irritating and debilitating consequences, only conduces to much general derangement of the system, destroying appetite and creating an injurious nervous excitement, augmenting suffering with frequent fatal results.

"EXCELSIOR" SPRING WATER. THE WATER OF THIS SPRING IS BELIEVED TO

THE WATER OF THIS SPRING IS BELIEVED TO be unequalled by that of any other in the far-famedi valley of Saratoga. Its virtues are such as have secured it the high encomiums of all who have used it, possassing, as it does, in an eminent degree, cathartic, diuretic, alterative and tonic qualities.

From SAMUEL HENRY DICKSON, M. Dr. Profissor Practice of Physic, Jefferson Medical College, Philadelphia, formerly of Charleston, S. C.:

PHILADELPHIA, November 15, 1965.

I have been for a year or more past in the habit of taking the water of the "Excelsior" Spring of Saratoga. Accustomed during the great portion or my invalid life to use the different waters of the several fountains which boil up slong that remarkable valley, dependent, indeed, upon them for much of the comfort I enjoy, I am satisfied that the Excelsior Water is as well adapted as any other among them, if not more so, to the purposes for which they are generally employed. It is very agreeable, strongly impregnated with the carbonic acid, lively and sparkling. * * * I can heartily and conscientiously recommend it to all who need a gentle cathartic and diuretic.
